Claims Status

Applicant's amendment and response filed on 7/27/2009 are acknowledged and entered.

Applicants have amended claims 4 and 21, and cancelled claims 3, 16, 19-20, and 23-24. Therefore, claims 1, 3-15, 17-18, and 21-22 are currently pending.

Claims 1, 3-15, 17-18, and 21-22 are allowable. Claims 3-9, 1-15, 18, and 21-22 are, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement among inventions species II, III, V and VI, as set forth in the Office action mailed on 2/2/2009, is hereby withdrawn** and claims 3-9, 1-15, 18, and 21-22 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

During a telephone interview with the applicant's representative on 7/24/2009, the agreement was made that, with respect to independent claim 1, the prior art of record does not

fairly teach the claimed “wherein said optical unit is a lenticular lens in which a plurality of cylindrical lenses is arranged such that a geometric axis of each cylindrical lens is substantially aligned with a space between the first pixel and the second pixel of at least one pixel section, and the geometric axis of said cylindrical lens extends along said second direction” along with the other claimed limitation.

With respect to independent claim 3, the prior art of record does not fairly teach the claimed “wherein said optical unit is a parallax barrier in which a plurality of slits is arranged such that a longitudinal direction of each slit is substantially aligned with a space between the first pixel and the second pixel of at least one pixel section, and the longitudinal direction of said slit extends along said second direction” along with the other claimed limitation.

With respect to independent claim 4, the prior art of record does not fairly teach the claimed “wherein a longitudinal direction of each slit is substantially aligned with a space between the first pixel and the second pixel of at least one pixel section, and the longitudinal direction of said slit extends along said second direction” along with the other claimed limitation.

With respect to independent claim 21, the prior art of record does not fairly teach the claimed “wherein said optical unit is a lenticular lens in which a plurality of cylindrical lenses is arranged such that a geometric axis of each cylindrical lens is substantially aligned with a space between the first pixel and the second pixel of at least one pixel section, and the geometric axis of said cylindrical lens extends along said vertical direction” along with the other claimed limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
